

Panduan Lengkap Melakukan Deep Pull **WhatsApp**

Kita Butuh 3 Hal

1

Your encryption key

Save your key. WhatsApp does not have a copy of it. If you forget your key and lose your phone, WhatsApp cannot help you recover your backup.

64-digit Encryption Key

2

mgstore.db.crypt15

21.7KB | 7/31/26 2:02 AM

**File backup
Whatsapp crypt15**

3

Untuk akun "Bambang"
Nomor belakang "9987"

09:54 ✓

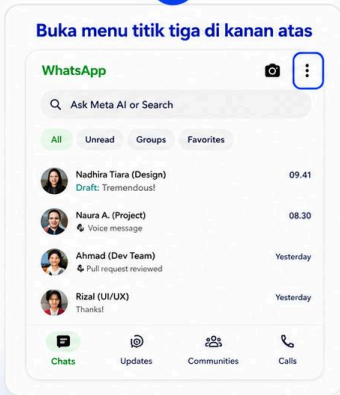

**Untuk nomor yang mana
& upload Drive**

IKUTI SEMUA URUTAN STEP DIATAS SECARA URUT AGAR TIDAK MENGULANG ULANG STEP!!!

1. 64-digit Encryption Key

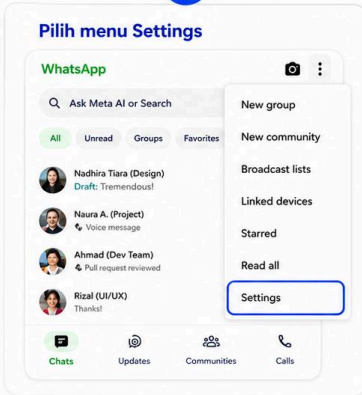

1

Buka menu titik tiga di kanan atas

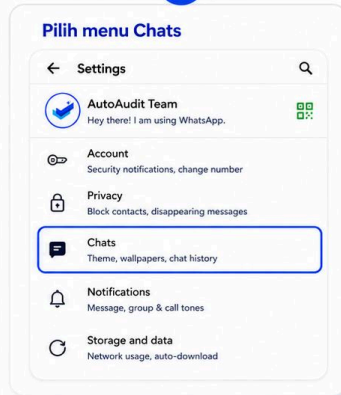

2

Pilih menu Settings

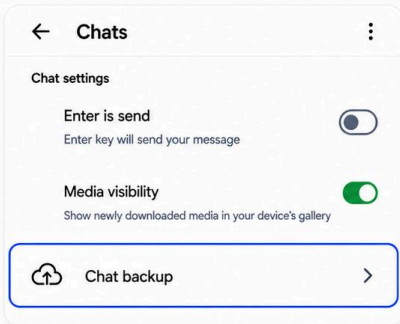

3

Pilih menu Chats

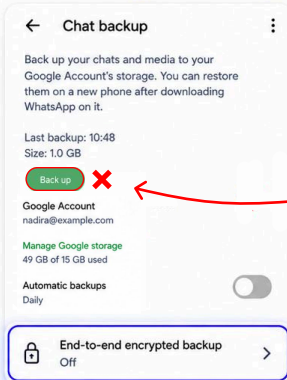

4

Pilih menu Chat Backup

5

Buka Encrypted backup settings

**JANGAN SAMPAI
TERTUKAR DENGAN
BUTTON INI!**

**Pastikan anda
menekan bagian ini!**

Manage Google storage

49 GB of 15 GB used

Automatic backups

Daily

End-to-end encrypted backup

On

**Jika sudah On atau Aktif sejak awal
maka hapus terlebih dahulu lalu
nyalakan kembali**

6

Tekan tombol More options

←

Add an extra layer of protection

- 🔒 Your backup will be safe, even if you lose your phone.
- 🔑 Secure your backup with a passkey, password or an encryption key.
- 👁️ No one else will be able to access your backup. Not even WhatsApp or Google.

Use passkey

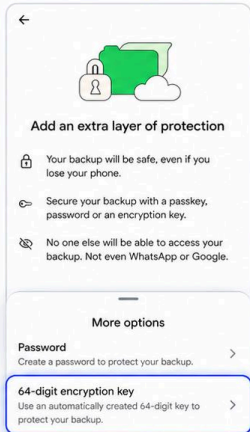

More options

Pastikan anda menekan bagian ini!

7

Tekan menu 64-digit encryption key

←

Add an extra layer of protection

- 🔒 Your backup will be safe, even if you lose your phone.
- 🔑 Secure your backup with a passkey, password or an encryption key.
- 👁️ No one else will be able to access your backup. Not even WhatsApp or Google.

Password
Create a password to protect your backup. >

64-digit encryption key
Use an automatically created 64-digit key to protect your backup. >

8

Tekan Generate your 64-digit key

←

Your encryption key

Instead of using a password, you can protect and restore your end-to-end encrypted backup with your encryption key.

Generate your 64-digit key

64-digit key akan muncul seperti di bawah ini

Your encryption key

Save your key. WhatsApp does not have a copy of it. If you forget your key and lose your phone, WhatsApp cannot help you recover your backup.

dcca	a426	7bbf	18b0
626e	ab43	78bf	2eea
242d	ea92	ecd2	1f35
6c9b	1955	721c	dc8b

Kunci ini bersifat unik dan hanya milik Anda.

**WAJIB
SCREENSHOT &
SIMPAN!!**

Simpan dengan aman!

Tanpa key ini, Anda tidak dapat memulihkan backup WhatsApp Anda.

10

Tekan Button Continue

11

Whatsapp akan melakukan konfirmasi ulang

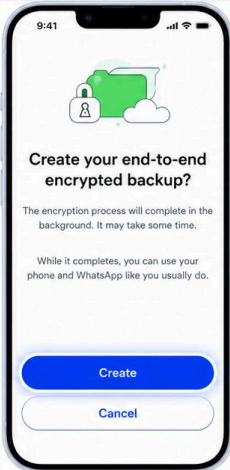

Anda bisa
screenshot ulang
untuk memastikan
64-digit key sudah
tersimpan.

2. File Backup **Whatsapp** crypt15

1

Setelah konfirmasi ulang anda akan diarahkan ke halaman ini dan tekan button Create

2

Whatsapp otomatis melakukan backup

← Chat backup

Back up your chats and media to the cloud so you don't lose them when you get a new Android phone.

Local: 3:23 AM

Last Backup: Never

Backing up messages (100%) 100%

Having issues?

End-to-end encryption

For added security, you can protect your backup with end-to-end encryption.

End-to-end encrypted backup

On

i Pastikan backup mencapai 100% dan muncul button Backup

Last Backup: 02:16
Size: 1.6 GB

Back up

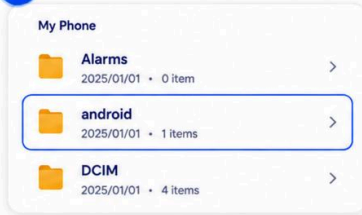

! Pastikan posisi End-to-end encrypted backup sudah ON jika mode Bahasa Indonesia "Aktif"

Kalau masih Off atau Non Aktif kembali ke Halaman 3

6 Buka File Manager

7 Pilih Folder Android

8 Pilih Folder Media

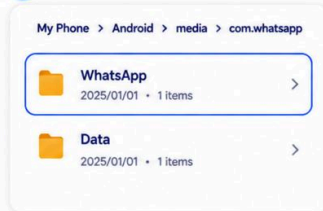

9 Pilih Folder com.whatsapp

Jangan tertukar jika pada HP terdapat kedua jenis akun

10 Pilih Folder WhatsApp

11 Pilih Folder Databases

Kenapa folder Android atau WhatsApp saya tidak ada?

 Music

Internal storage

 **Android**
11/04/2026 | 5 items

 **com.android.settings**
11/04/2026 | 1 item

Tekan icon tanda titik 3 di halaman utama File Manager

Aktifkan pengaturan “Tampilkan file tersembunyi”

Tampilkan file tersembunyi ☐

Settings

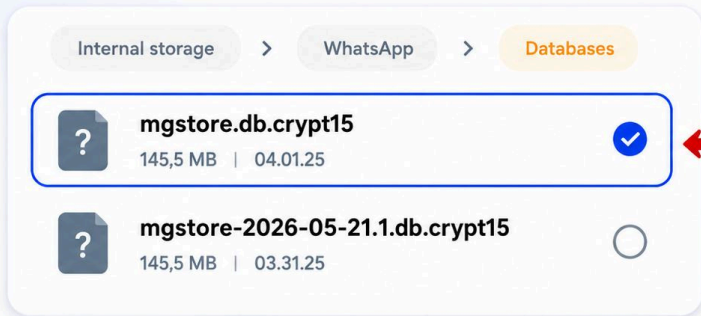

Displayed items

Don't show Gallery items and screenshots among recent files ☐

Show hidden files ☒

12

Pilih File Backup crypt15

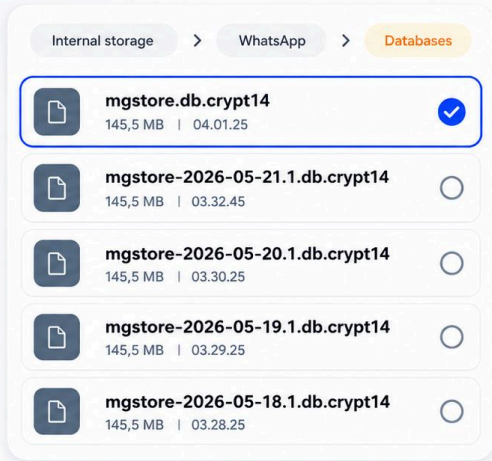

**WAJIB FORMAT
crypt15**

Hanya file dengan format
crypt15 yang boleh digunakan
sebagai file backup.

✗ CRYPT14 TIDAK BISA!

Kalau saya lihat crypt14 pada isi folder artinya apa?

Artinya **backup terakhir** adalah sebelum **64-digit key** menyala atau terakhir kali melakukan backup **BELUM SELESAI**.

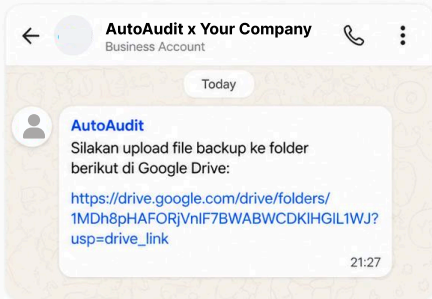

Pastikan kode 64-digit encryption key **TELAH MENYALA** dan ulang dari **halaman 8 (File Backup Whatsapp crypt15)**

3. Kirim file backup sesuai format

1

Buka link Google Drive yg
dikirimkan tim AutoAudit

2

Buka link Google Drive yg
dikirimkan tim AutoAudit

Folder baru

8798 - Bambang

Batal

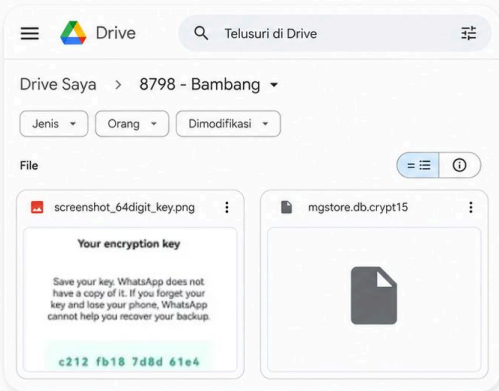

Buat

Format penamaan folder:
[4 nomor Whatsapp terakhir] - [Nama akun]

3

Masukkan file screenshot 64-digit encryption key & file backup mgstore.db.crypt15

4

Kirimkan link folder ke tim AutoAudit

**kalau sudah melakukan semua ini
selamat **deep pull** anda selesai 🎉**

tolong kabarkan ke tim kami dan kita akan
memproses pemasukan data maksimal **h+2**
